BINGHAM STOCK IS SOURCE OF QUERY

Stockholders of Bingham Central Standard Cannot Figure Out Reason of Low Price of Security.

For some time past stockholders of the Bingham Central Standard Mining company have been trying to figure out why the stock is selling around 14 cents, when 10 months from now it can be transferred for Utah Metal stock, which is selling in the eastern market at from \$3 to \$5.50 a share. The trans-fer is to be made on the basis of three shares of Bingham Central for one of Utah Metal. At this rate Bingham Central Standard stock at 15 cents a share buys for 45 cents stock worth at least \$3 a share on the castern market. Local stockholders have been inquir-ing for a long time the reason for this grent difference in value. It is said great difference in value. It is said by some that the stock has been deby some that the stock has been de-pressed through manipulation to keep it where it can be handled. Some have even gone so far as to state that Bing-ham Central stock has been purchased and the stock deposited with the Com-monwealth Trust company of Boston, where a receipt was issued. As this receipt calls for Utah Metal stock it has been sold at a profit to eastern buyers. been sold at a profit to eastern buyers BASIS OF CONSOLIDATION.

When the consolidation was made of the Bingham Central Standard holdings and the Bingham Metals property a new incorporation was formed known as the Utah Metals Mining company. The new company set aside 300,000 shares of its stock for the purchase of the Bingham Central property and also assumed the \$47,000 of bonded indebtassumed the \$347,000 of bonded indebtedness of the property. As the Utah
Metals company had no indebtedness
and a small capitalization, 415,000 shares
of stock were set aside for its purchase.
The company also set aside 175,000
shares for new and convertable bonds
that can be issued to pay off the present
issue. This left 610,000 shares in the
treasury for development work and
other purposes. According to the agreement entered into at the time the stock
would be pooled until Nov. 11, 1911,
or at such time before that time as
the directors should see fit to break the
pool. So this means that in a little over
10 months the stock will be exchanged. pool. So this means that in a little over 10 months the stock will be exchanged.

Badger Brothers | MARKET ABOUT HOLDING ITS OWN

New York, Dec. 16.—The feature of the stock market at the opening today was the heaviness of United States Steel, which reflected reports of restricted operations by that company. Six thousand shares enanged hands in the initial trading at 724, a fractional decline from yesterday's close. Wells-Fargo advanced 25 points and some of the special group displayed strength but elsewhere changes were unimportant.

Prices took a brief upward turn, the strength shown by a few specialities stimulating a slight general demand. American Hide & Leather preferred advance 1, Pittsburg, Cincinnati, Chicago & St. Louis 1 and National Biscuit 3. Heavy selling of United States Steel depressed it a point to 714 and forced the other representative stocks fractionally below yesterday's closing, Philadelphia company lost 1. The tone was better at 11 oclock.

yesterday's closing. Primate pany lost 1. The tone was better at 11 o'clock.

In keeping with the preceding markets of the week business fell off in the second hour, but prices made general recovery-from the low points. The movement plainly lacked lendership, however, and the list drifted idly. The strongest stocks were those more or less subject to pool manipulation. Announcement that the United States Steel corporation had decided to curtail operations at one of its leading plants occasioned little surprise. American Snuff sold 38 points above its preceding sale last month.

Honds were firm, with Georgia Central mounes notably strong.

The market was without essential change during the mid-day hour and business was the smallest yet.

The stability of prices despite the absence of demand was favorably commented on but none of the active trading interests seemed disposed to prices sufficiently to attract a following.

The market closed steady. Speculative conditions were unaltered, the market uling interests were unaltered, the market uling intensely dull and prices scarcely moving. At the finish prices were practically unchanged from yesterday's closing. Philadelphia Company rose 3.

PRODUCE.

CHICAGO. CHICAGO.

Chlcago, Dec. 16.—Large shipments from Argentina, India and Australia served as a pretext for a reduction in wheat prices today. The total from the Argentine this week reached 1,064,000 bushels as against 604,000 bushels as against following the sex of the

corn. May opened 474 to 1 down, at 47@ to 474 d., fell to 472@ 1 and recovered to 478.

Oats were easier, with other grains. Cash houses sold. May started unchanged to \$10 ft at 34\$ to 34\$ but reacted to 34.

The fact that the hog run here and west was lighter than expected strengthened provisions but offerings became plentiful and the advance did not hold. First sales were 15 to 17\$ higher and 5c. lower with May pork at 18.10 to 18.07\$; 10.02\$ for lard, and 2.60 for rbs.

Wheat—Comment on the unparalleled increase of the Russian wheat area put traders into a still more bearlsh mood. Rain in Argentina and liberal estimates of the expert surplus there added to the weakness. The close was easy at 35\$, a net loss of \$20\$.

Corn—Heavy consignments kept the market depressed. Close was weak with May at 47\$, a net loss of \$2\$.
